

President Trump's Inauguration Speech

I watched much of the Inauguration Activities on Friday, swearing in, signing of papers, the parade, and the 'balls.' All together I recorded about 800 images. But what I will remember, and be thankful for, is Donald Trump's acceptance speech, click [HERE](#). If you did not listen to it, and even if you did, listen to it again and again.

President Trump's speech is everything the TEA Party sought. Several months ago I urged everyone to begin holding him to the promises he made on the campaign trail. Though I urge you to still do that his speech left me with the impression that may not be necessary.

The likely problem is that the Left, the Democrat politicians, the Snowflakes, the radicals, the whatever-crazies will attempt to make his life miserable and try to impeach him. So if you one of the Grass Roots that supported Trump, or if you were once a TEA Party person and have any Pro-Active Spirit remaining I urge you to send him emails, call him, etc., and let him know you are behind his goals and actives. If you do not know his goals then listen to his acceptance speech.
